

## Recommended Vehicle Maintenance Checklist

### Every 10,000 km:

- Check the engine oil and oil filter.
- Check the tire pressure and tread depth.
- Inspect the brakes and brake fluid.
- Check all lights and signals.
- Inspect the battery and battery terminals for corrosion.
- Check and top off windshield washer fluid, coolant, transmission fluid, power steering fluid.
- Inspect the belts and hoses for wear or damage.
- Inspect the exhaust system for leaks.
- Check the suspension and steering components for wear.

### Every 30,000 km:

- Change the oil and oil filter.
- Check the air filter and replace if necessary.
- Check the tire pressure and tread depth.
- Inspect the brakes and brake fluid.
- Check all lights and signals.
- Check the battery and battery terminals for corrosion.
- Inspect and top off windshield washer fluid, coolant, transmission fluid, power steering fluid.
- Inspect the belts and hoses for wear or damage.
- Inspect the exhaust system for leaks.
- Check the suspension and steering components for wear.

### Every 60,000 km:

- Replace the air filter.
- Inspect the spark plugs and replace if necessary.
- Inspect the fuel system, including the fuel filter and fuel pump.
- Check the engine's timing and adjust if necessary.
- Inspect the engine for leaks, wear, and other issues.

### Seasonal Maintenance:

- Check the air conditioning system before summer.
- Check the heating system before winter.
- Check the windshield wipers and replace if necessary.
- Inspect the tires for wear and rotate them.
- Check the alignment and balance of the wheels.

### Annual Maintenance:

- Check the air conditioning system.
- Check the heating system.
- Check the windshield wipers and replace if necessary.
- Inspect the tires for wear and rotate them.
- Check the alignment and balance of the wheels.

### Long-Term Maintenance (Every 60,000 - 120,000 km):

- Replace the timing belt.
- Replace the water pump.
- Inspect and possibly replace the drive belts.
- Check and possibly replace the shock absorbers.
- Inspect and possibly replace the brake rotors and pads.
